Objectives

Junior Software Developer with one plus years of experience in computer engineering seeking exciting and educational opportunities for organizations to grow as a professional.

Key Skills

Programing languages : C++ (algorithmic problem solving), Javascript, Java, Sql, Visual Studio, CSS3, HTML5, React, Node.js, MongoDb (personal projects).

EDUCATION

Full Stack Engineer
Codecademy
1/2021 - Present

Computer Science Program
WellCode
10/2019 - 10/2020

Quality and safety control technician
Pin University Prato
3/2012 - 3/2013

Chemistry
A.I.Cuza Univ.
10/2003 - 10/2006

Scientific High School Diploma
D.Cantemir Lyceum
10/1998 - 10/2003

Projects

HTML & CSS Portfolio Responsive Website
3/2021 - 4/2021

I made a CSS & HTML Portfolio Website for practice and learn to make it responsive, used a few lines of JS, CSS animations, off canvas menu and flex layout.

REACT Portfolio Website

4/2021 - 5/2021

I made a Portfolio Website using REACT JS, with a clean design and responsive and also added smooth scroll which make the scroll experience really elegant.

SOCIAL MEDIA APP

7/2022 - Present

I buid a Node.js Express real-word social media app REST API with login, register and all CRUD operations using MongoDB models with Node.js routers. The FrontEnd of the application is created with React.js using React Components and Hooks.

Achievements

Menthorship Program

WellCode.com

10/2020

Took part in the WellCode Menthorship Program, during this period of time I solved over 200 algorithmic problems, learned about data structures, object oriented programming and I also worked with Java and Sql.

Languages

Romanian Mother Tongue Language	Italian English
